

NGUYỄN HOÀNG TUỆ SANG

FULLSTACK DEVELOPER

Address: Tỉnh lộ 8, Ấp 20, xã Phú Hòa Đông, Củ Chi, TP.HCM
Phone: 0977064053
Birth: 15/10/2004
Gender: Female
Email: nguyenhoangtuesang@gmail.com
Website: <https://portfolio-delta-fawn-10.vercel.app>
Github: <https://github.com/Sang1011>
LinkedIn: <https://www.linkedin.com/in/tue-sang>

SUMMARY

Fullstack Developer experienced in building scalable web applications using React, Next.js, TypeScript, .NET, NestJS, and Node.js. Skilled in both frontend development and backend system design, with a strong focus on clean architecture, maintainable code, and seamless user experiences. Passionate about developing impactful products and collaborating in fast-paced engineering environments.

SKILLS

- **Programming Languages:** C, C#, Java, JavaScript, TypeScript
- **Frontend:** HTML5, CSS3, SCSS, React, Next.js, React Native
- **Backend:** Node.js, Express.js, NestJS, ASP.NET Core
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Cloud & Deployment:** Firebase, Railway, Vercel
- **DevOps & Tools:** Docker, Git, GitHub, GitLab, Postman, Android Studio, Figma
- **Architecture:** RESTful API, MVC, Clean Architecture
- **Game Development:** Unity (C#)
- **Languages:**
 - English: Intermediate (B2 – Strong Reading, Writing & Listening)
 - Japanese: ~JLPT N4

WORK EXPERIENCE

CEH INFORMATION SERVICES COMPANY LIMITED (Frontend Intern) Jan 2025 - Apr 2025

Role: Frontend Developer

Project: VTOS - Vietnam Terminal Operation System

Tech: Next.js, TypeScript, Leaflet.js, AntD, TailwindCSS, OpenStreetMap, Redux, React-query

- Designed and developed responsive UI components for a port, container, and yard management system in the logistics domain.
- Integrated RESTful APIs into the frontend, handling data fetching, transformation, and state management across complex logistics workflows.
- Implemented interactive map features using Leaflet.js and OpenStreetMap, including real-time truck routing visualization and vessel tracking to reflect live cargo movements at the port.
- Participated in code reviews, UI validation, and frontend contributions following team conventions under senior guidance.

Project: VASSCM - VietNam Automated System for Seaport Customs Management

Tech: Next.js, TypeScript, AntD, TailwindCSS, Redux, React-query

- Developed and maintained UI for customs declaration management, import/export yard reporting, and related logistics workflows.
- Handled frontend business logic including state management with Redux, form validation, and RESTful API integration.
- Reviewed and edited API documentation (Google Docs, Word) to ensure accuracy and clarity before handoff to the Backend team.
- Participated in code reviews and contributions following team conventions under senior guidance.

EDUCATION

FPT UNIVERSITY HCM Campus

Sep 2022 - Apr 2026

Major: Software Engineering (Specialization: .NET Development)

GPA: 3.56 / 4.0

PROJECTS

AlPromo — Smart Marketing & Digital Ticketing Platform (Capstone Project)

Jan 2026 - Apr 2026

Role: *Frontend Developer* | **Team size:** 5

Techs: React, TypeScript, TailwindCSS, Redux, React Native, Firebase, Recharts, React-Konva, DnD Kit, VNPay

URL: [Live Demo](#) | [Web GitHub](#) | [APKPure](#) | [Mobile GitHub](#)

- Built an interactive seat map editor using React-Konva, supporting drag-and-drop creation and editing of seats, zones, and sections for event layout configuration.
- Developed AI marketing content editor with drag-and-drop block reordering using DnD Kit
- Integrated VNPay payment gateway for ticket purchases and organizer wallet top-ups, including AI package subscription management.
- Implemented Firebase Realtime Database for order expiry tracking, triggering automatic order cancellation after 15 minutes via cron job.
- Developed organizer dashboard with event analytics and reporting using Recharts.
- Built React Native mobile app for on-site QR code check-in and event operations.
- Participated in database design and system architecture planning.
- Integrated docx-preview for in-app policy document rendering.

SmartCalo — Nutrition & Calorie Management App

Sep 2025 - Nov 2025

Role: *Frontend Developer* | **Team size:** 4

Techs: React Native, Expo, TypeScript, Redux, Firebase, Expo Camera, Expo Router

URL: [APKPure](#) | [GitHub](#) | [Landing Page](#)

- Built a full-featured mobile app for calorie tracking, nutrition management, and personalized meal planning.
- Integrated AI-powered food recognition via camera to automatically identify dishes and calculate calories and macronutrients.
- Implemented TDEE calculation and dynamic macro allocation based on user body metrics and fitness goals.
- Developed progress tracking with visual charts using React Native Gifted Charts.
- Integrated push notifications and calendar-based meal planning.

BloodDonation — Blood Donation & Logistics Management System

May 2025 - Aug 2025

Role: *Backend Developer* | **Team size:** 4

Techs: TypeScript, NestJS, MongoDB, Cloudinary, JWT, WebSocket, EmailJS

URL: [GitHub](#)

- Designed and implemented a RESTful API for end-to-end blood donation lifecycle management, covering donor registration, donation scheduling, blood inventory tracking, and hospital blood requests.
- Built a Central Blood Storage module managing hospital and mobile blood banks, including CRUD operations, blood expiry tracking, and real-time status updates (available, in-use, expired).
- Developed a Blood Export & Logistics module to handle transport orders from central storage to mobile/hospital units, with shipment status tracking (In Transit, Delivered, Expired).
- Implemented real-time push notifications via WebSocket Gateway to alert staff on blood expiry and new availability; integrated EmailJS for automated email verification and notifications.
- Integrated an AI Chatbot to assist donors and staff with blood donation FAQs, medical eligibility, and process guidance.
- Built a Geolocation-powered Search module to find nearest blood storage by GPS coordinates, filter by blood type, and query by province/city.
- Implemented JWT-based authentication with Refresh Token rotation, password hashing, email verification, and role-based access control (Admin, Donor, Receiver, Doctor).
